# ABOUT US

With a team of interior designers, product designers and engineers, we continue to work on finding new ways to use our textiles.

As a leading manufacturer of optical textiles, we have been committed to the research and development of new products since the mid-2000s and are exploring new fields of application for our textiles with great innovation.

The starting point for the development of our lighting technology special fabric ETTLIN LUX® was the question of how to design light - independent of the already known materials - with textiles.

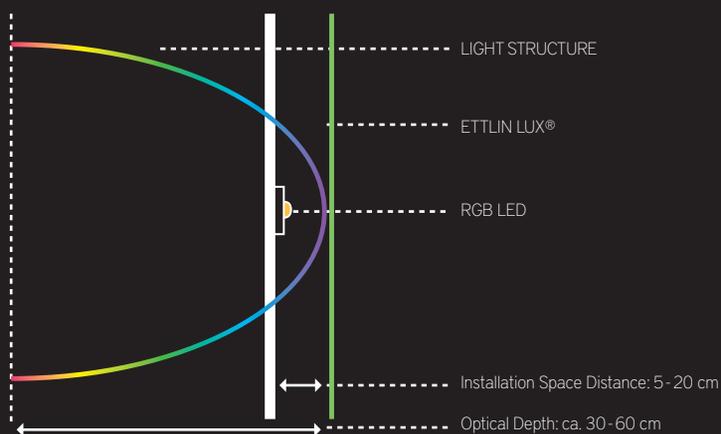

The objective was to develop a textile that on the one hand is translucent and on the other gives the medium of light another exciting dimension. The birth of ETTLIN LUX®.

## What is ETTLIN LUX®?

ETT LIN LUX® is a worldwide unique and patented textile, which creates three-dimensional lines of light from light sources, which are arranged behind the textile. As a result, ETT LIN provides LUX® provides a fascinating combination of aesthetics and lighting design.

Depending on the arrangement, fabric type and distance of the light source to the textile can be designed almost endlessly many lighting effects. ETT LIN LUX® products always have one thing in common: they fascinate viewers.

# OUR TEXTILES

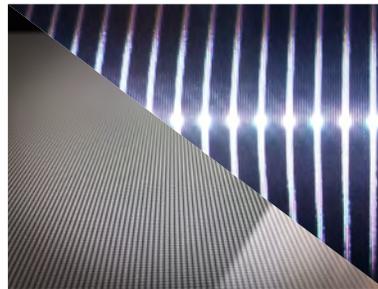

**ETTLIN LUX®** Decolux

## **An ideal combination of textile and light**

Decolux is an ideal combination of aesthetic surfaces and pleasant haptics combined with three-dimensional lighting design. The effect lines of Decolux create exciting accents and increase attention. Thanks to the textile, decorative surface, Decolux is also convincing when switched off.

- Color: black and white
- Textile feel
- Can be combined with acoustic panels
- Recommended for decorative applications
- Fire protection class: B1
- Usable width: 1.95 m
- Roll length: 5 m | 10 m | 30 m
- Laminatable : no
- Printable: yes
- Clarity: opaque
- Processing: piping | can be glued all around or over the entire surface | tacking

**ETTLIN LUX®** Mood

## **Fabric for glass and acrylic**

The ETTLIN LUX® Mood fabric is mainly used for lamination in glass or acrylic. With intense effect lines, the light sources are most visible. Its processing options are diverse: embedded in glass or acrylic or as textile covering.

- Color: silver and black
- Technical appearance
- Light source is visible
- Intensive lighting effect
- Recommended for glass and acrylic laminates
- Fire protection class: B1
- Usable width: 2.00 m
- Roll length: 5 m | 10 m | 30 m
- Laminatable: yes
- Printable: no
- Clarity: high
- Processing: piping | can be glued all around | Tacking | Laminate

# FRAME SYSTEMS

Ask for our  
sample frame  
set!

Customizable frame systems: Effective in shape and light

Our frame systems come in different sizes and shapes. Equipped with the ETTLIN LUX® textiles, they become textile light boxes that can be used on walls, ceilings or freestanding.

Our frame systems are available in three versions:

- BASIC
- STANDARD
- PROFESSIONAL

## Project planning

We support you from the beginning to the installation with our project planning team.

The right solution for you in just three steps:

### 1. Fabric selection

From three types of fabric (Decolux, Miracle and Mood) choose the right fabric for your project.

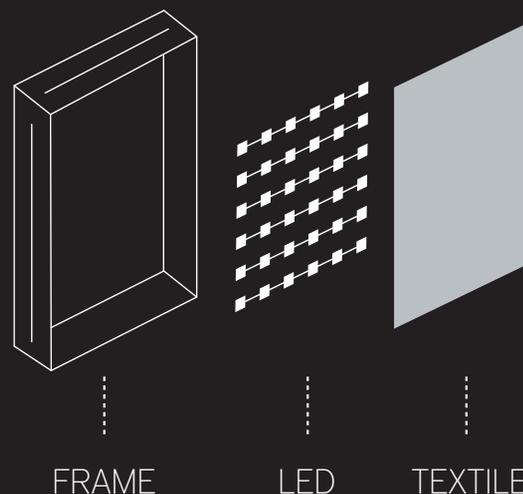

### 2. Frame system

Depending on the application, you can select the type and shape of the frame system for your lighting design project.

### 3. Effect type

You choose the kind of light effect (static or dynamic) that your light design concept should bring forward.

Detail drawing piping system

Frame system

## BASIC

### Customizable frame system with ETTLIN LUX® fabric for your own lighting design

You would like to work with ETTLIN LUX® in your project and carry out the light installation yourself? No problem - with our BASIC frame system, you have the lighting design in your own hands.

The BASIC frame system includes:

- Frame on measure
- Customizable in size, depth and color
- Assembled and piped ETTLIN LUX® textile
- Back plate for independent LED mounting
- Possible printing, frame sizes and prices on request

Frame system

## STANDARD

### Frame system with ETTLIN LUX® fabric, pre-assembled LEDs and static light effect

You would like to work with ETTLIN LUX® in your project and leave the LED installation to us? With our frame system STANDARD we offer you the complete ETTLIN LUX® package with static light effect.

The STANDARD frame system includes:

- Frame on measure
- Customizable in size, depth and color
- Assembled and piped ETTLIN LUX® textile
- LED installation with static light effect

Frame system

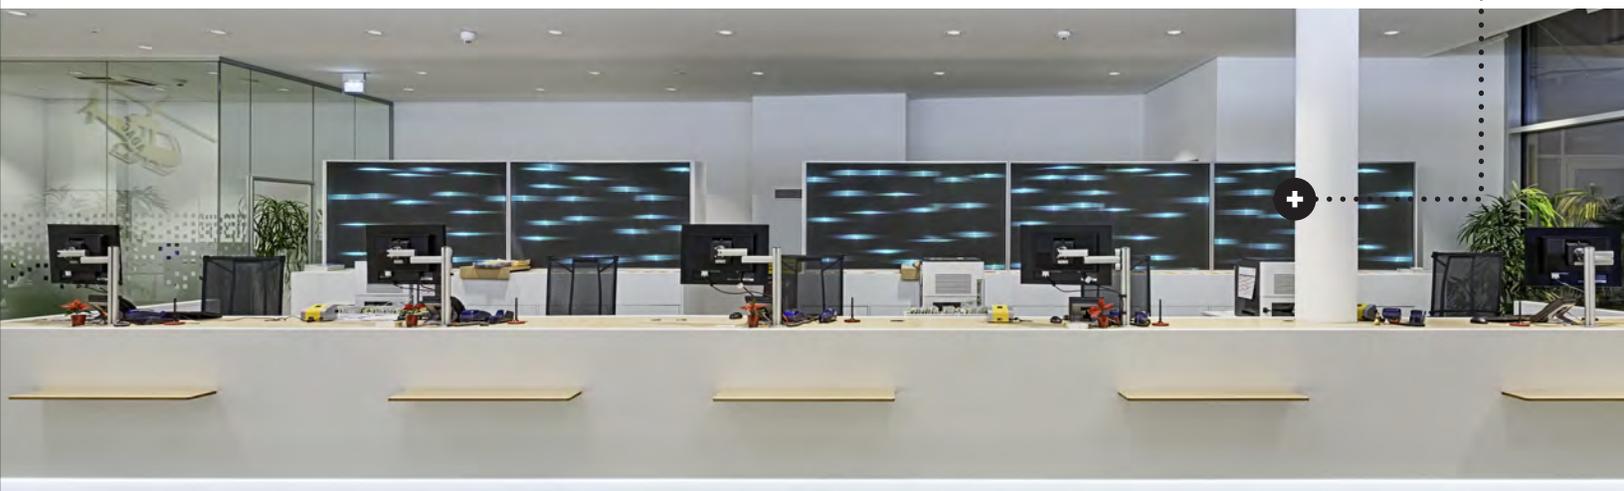

## PROFESSIONAL

### Frame system with ETTLIN LUX® fabric, pre-assembled LEDs and dynamic light effect

The PROFESSIONAL frame system is our ETTLIN LUX® premium product. The dynamic LED backplane offers almost infinite effects. Depending on your wishes, you can always create new, individual light animations. We are happy to assist you.

The PROFESSIONAL frame system includes:

- Frame on measure
- Customizable in size, depth and color
- Assembled and piped ETTLIN LUX® fabric
- LED installation with dynamic lighting effect

# LUMINAIRES

We support you  
in the planning &  
realization of your  
project!

Unique lights for your project: with 3D lighting effect

Unique, three-dimensional light structures, energy-saving LEDs and individual customized items are just some of the features that distinguish the luminaires of ETTLIN LUX®. You have an idea? The application possibilities of our products are almost unlimited. Talk to us.

Our luminaire collection:

- MATRIX ring light
- MATRIX floor lamp
- MAGMA cylindric light

In cooperation with Peters Leuchten and Kardorff Ingenieure Lichtplanung we work on our product developments. We bring our know-how to special fabrics in combination with the knowledge of lighting design and thus create unique luminaires with a deep effect. We realize versatile lighting concepts based on high quality products and custom made.

**MAGMA cylindric light** with ETTLIN LUX® Miracle Textile

**MATRIX floor lamp** with ETTLIN LUX® Miracle Textile

MATRIX

## Ring light

### Excellent and striking

What is special about this ring light that by their three-dimensional light effect and the high quality a real eye-catcher in the interior design is created. This product can be customized and used in almost every project.

The MATRIX ring light Duo is for example, in the following sizes available:

- Ø 1.000 mm (84 W)
- Ø 1.500 mm (130 W)
- Ø 2.000 mm (178 W)

MATRIX

## Floor lamp

### Accent lighting in the form of a floor lamp

Designed by ETTLIN LUX® and Peters lights, we bring the three-dimensional optical effect in the form of a floor lamp to illuminate. In this way the series can be adapted to the space context.

The MATRIX floor lamp is available, for example, in the following version:

- Height: 1.900 mm
- Diameter: 400 mm
- Power: approx. 80 W

MAGMA

## Cylindric light

### Glass lamp with downlight

The MAGMA cylindric light is used indoors and can be varied in color and lighting effect. The special fabric (Miracle) of ETTLIN LUX® is encased in glass and makes the cylindric light look very noble. In addition, a downlight provides the appropriate lighting.

The MAGMA cylindric lamp is, for example, in the following heights available:

- 340 mm (27 W)
- 680 mm (48 W)

# LUMINAIRES

Smart luminaires with ETTLIN LUX® textiles

Estelle uses three-dimensional lighting effects to create a moving atmosphere that captivates the senses. Individual points of light form curved arcs with a fascinating depth effect. By a touch, these adapt to the individual desires to create the perfect mood.

Embedded in a protective body of glass, the technology shows itself in all its brilliance and creates a very special light. Their light brings more than just lighting into the room. Their light creates atmosphere. The Vanory lamp is available as a pendant or table lamp from us.

#### ESTELLE SUSPENSION

##### **Smart pendant light with floating light effects for a charming atmosphere in the room**

Despite the many possibilities, one thing remains very simple: the operation. As with a conventional light, it is sufficient to switch on and off. The screen is illuminated sensor-controlled to match the light of the lamp. Is a different mood desired, only needs to touch the touch panel on the lamp or a click in the vanory smartphone app.

#### ESTELLE TABLE

##### **Innovative lighting technology integrated in handmade glass and the textile Mood from ETTLIN LUX®**

Each Estelle luminaire blends innovative lighting technology with hand-crafted glass and specially woven textile made by ETTLIN LUX®. Like all other items, they are made from carefully selected materials from selected manufacturers who are considered to be masters of their craft. In the vanory lighting factory, they are carefully assembled, individually numbered and accurately checked. Because the highest value is placed on the perfect execution of every single manufactured luminaire.

# MIRROR

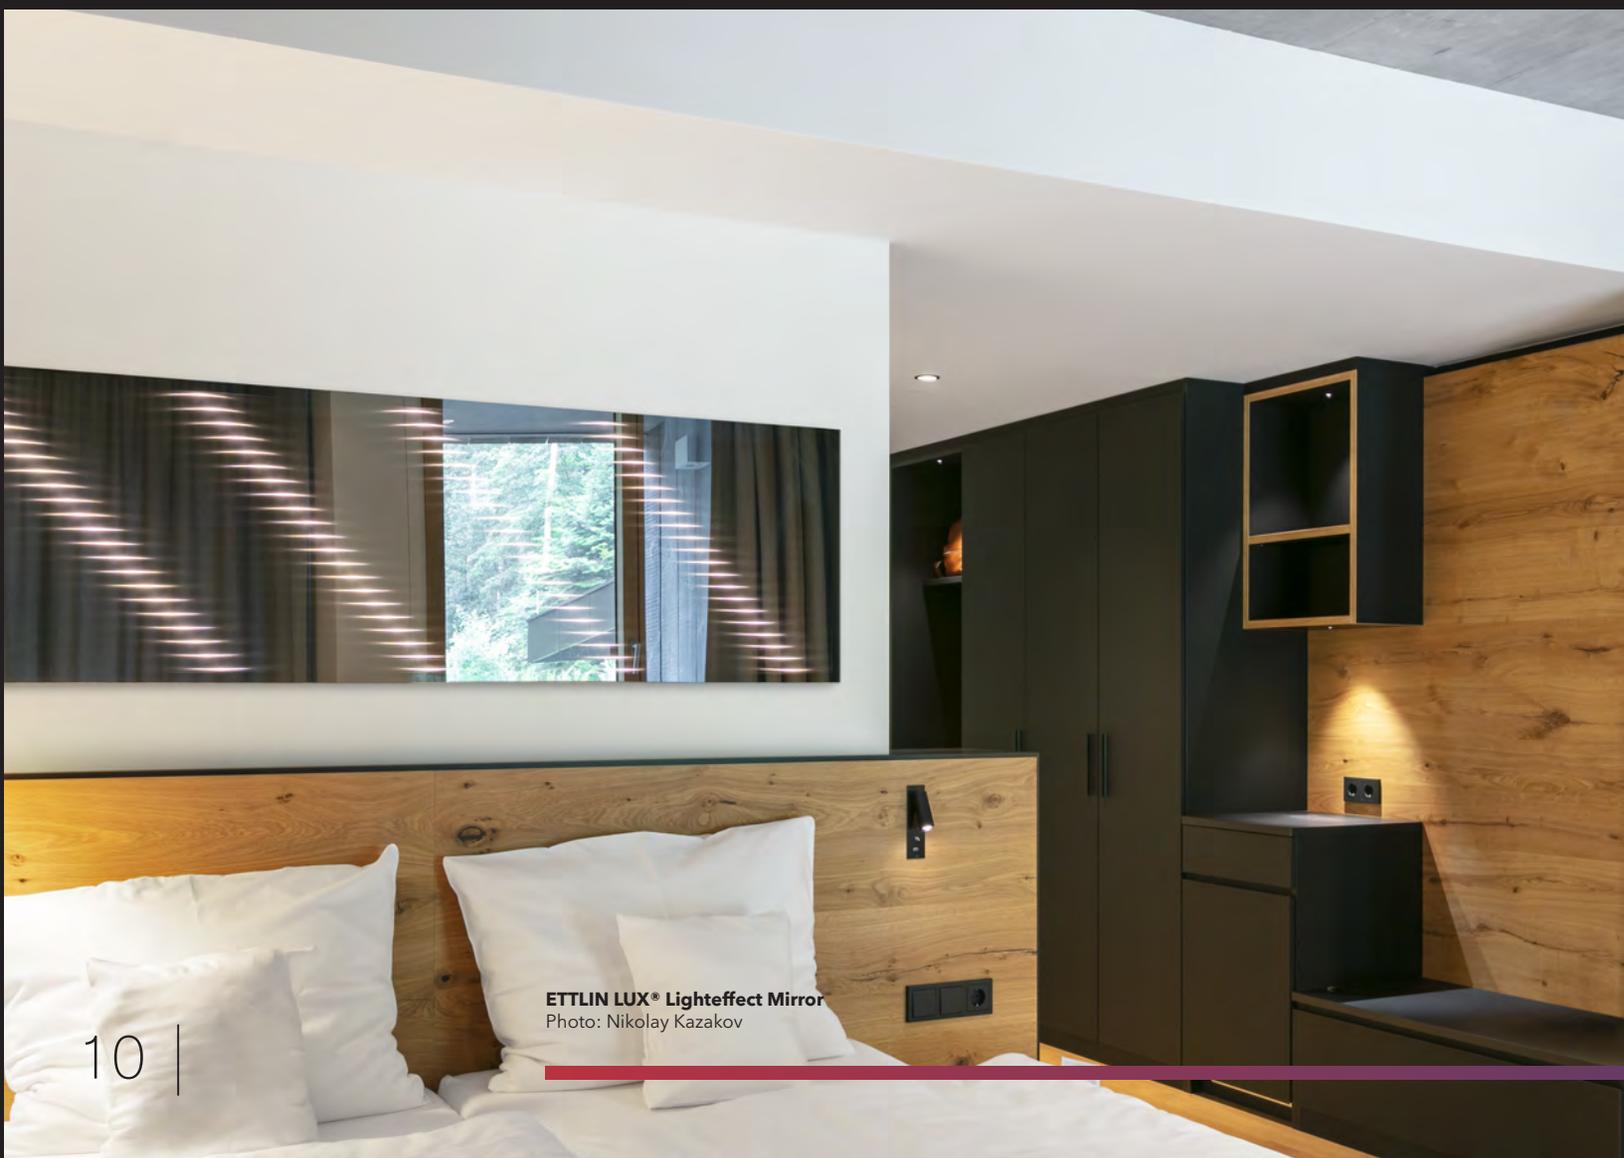

ETTLIN LUX® Innovation: Deep light effects in the mirror image

Bring a new and surprising element to your interior design project, extending the depth of the room at the same time. In addition to the functional aspect, the two mirror products ETTLIN LUX® Lighteffect Mirror and Mirroglass are also convincing with their light effect in the mirror image.

Depending on the project requirements, we have the right product in our ETTLIN LUX® mirror series:

- **ETTLIN LUX® Mirroglass:** A mirror glass with lighting effects for customized design concepts
- **ETTLIN LUX® Lighteffect Mirror:** A wall-mounted mirror for visual highlights in interior design
