Wall-mounted mirrors for visual experiences in interior design

With **Ambloom®** Mirror, interior designers and lighting designers rely on a surprising interior design object.

**Ambloom®** is a design mirror, ambient lighting object and functional product in harmony. The sophisticated, translucent mirror glass is combined with the ETTLIN LUX® lighting textile.

The LED light sources are an integral part of the mirror and achieve a deep light effect in the mirror image. This light effect emphasizes the uniqueness of the mirror.

The mirror is a decorative mural when the light is switched on. By switching the light off, it keeps the function of a classic mirror.
